

UK GTEM USERS GROUP

AGENDA of meeting to be held at Measurement
Technology Ltd, Power Court, Luton LU1 3JJ
AT 10.30 FOR 11AM
ON Tuesday 25th May 2004

SUBJECT: Review of members activities and the current
work on the standards

SPEAKERS: Angela Nothofer and an open forum

The group has not met since 28th October 2003 and it is
time we all met again to compare notes. Angela has news
of the maintenance phase of EN61000-4-20, and the first
tentative steps of the IEEE GTEM Project, also the
timescale of the next NPL GTEM study.

If you have some interesting results to show us regarding
the performance of the GTEM, or any related test
equipment, then please bring it along. Send the Chairman
[roger.dixon@aeroflex.com] any contributions you have
that are interesting or are a puzzle to you!

We had originally chosen to meet on June 1st but back in
January I notified a change in this to May 25th to avoid the
half term holiday; so I hope you all have a note of the date
and are still able to make it.

If you are no longer the 'GTEM person' in your company
may I please ask you to pass this information on. You
should also have received the minutes in January - can
you please bring them with you or pass them on as
appropriate.

I look forward to meeting you

Kind regards

Roger Dixon

Chairman
