

CALLING NOTICE FOR

THE JULY 2006 MEETING OF THE UK GTEM USER GROUP

TO BE HELD ON **TUESDAY 11TH JULY 2006**

AT MEASUREMENT TECHNOLOGY LIMITED, POWER COURT, LUTON
AT 10.30AM FOR 11AM START

This meeting will include various items:

Martin Alexander has produced a new article we can consider on “**The influence of cables on the uncertainty of EMC radiated emission measurements above 1GHz**”

Richard Marshall has been asked to enlighten us on “Cable Bundling” and to outline what development needs to be done on **resistive resonance-damping** of cables above 1GHz. He is looking for a **partner** in this work

Angela Nothofer has sent in brief details of a future project at Nottingham University for **further work on EUT with cable configurations**. If approved it will need non-financial **support** from companies. She is also taking names of any observers for the JTF-TEM meeting in Portland Oregon on Sunday 13 Aug, if anyone is going to the IEEE EMC Conference.

Roger Dixon will circulate his **submissions** on behalf of the group for the NPL/NMS/DTI programme also comments on the new draft CISPR32 and CISPR35 multimedia standards, for ratification.

Information exchange about companies and **new products**

Standards watch – recent issues

The Minutes of our meeting on 28TH MARCH 2006 will follow shortly.

If you have any doubts about the minutes tell the Secretary as soon as possible!

If you are inspired to take some action of your own please do so!

It is very encouraging to **get feedback** from individual members about their own experiences – we can all learn from such experiences however minor or complicated they seem to be. Has anything happened in your lab/etc in the last 12 months?

We look forward to seeing you on **JULY 11TH**. Location instructions are available from the secretary. Refreshments are free thanks to MTL.

Ian Alderman (Secretary) Roger Dixon (Chairman – sponsored by Aeroflex)
